## Detailed Action

### *Reasons for Allowance*

1. Claims 3-12 (renumbered 1-10) are allowed.
2. The following is an examiner's statement of reasons for allowance:

This application is for a disk cartridge drive apparatus with a disk cartridge.

- **Claims 1 and 6** specifies a disk cartridge drive apparatus with a disk cartridge which requires:

*"...wherein when the disk cartridge is inserted into the holder, if the shutter opening piece is inserted into the insertion groove, the shutter opening piece is moved to a portion of the ejection direction side of the insertion groove, and if the shutter opening piece is inserted into the function expansion groove, the shutter opening piece being is contacted with an aperture edge of the function expansion groove formed at the continuous portion to thereby prevent the insertion of the disk cartridge into the holder."*

These features, in combination with the other features of Claims 1 and 6 are not anticipated by, nor made obvious over, the prior art of record.

- **Claim 8** specifies a disk cartridge drive apparatus with a disk cartridge which requires:

*"...a projection engaging with said function expansion groove provided at said arc surface of said recording medium cartridge to prevent erroneous insertion of said recording medium cartridge when said recording medium cartridge is inserted into said holder in a backward direction."*

These features, in combination with the other features of Claim 8 are not anticipated by, nor made obvious over, the prior art of record.

- **Claim 9** specifies a disk cartridge drive apparatus with a disk cartridge which requires:

*"...a function expansion groove is provided in the vicinity of at least one said side of said substantially rectangular portion of said arc surface of said semi-circular portion,*

*an opening for recording information from the recording medium drive device onto said recording medium or reading information recorded on said recording medium is provided in said semi-circular portion or said substantially rectangular portion, and provision is further made of a projection engaged with said function expansion groove provided in said arc surface of said recording medium cartridge and suppressing erroneous insertion of said recording medium cartridge when said recording medium cartridge is inserted into said holder upside down. ”*

These features, in combination with the other features of Claim 9 are not anticipated by, nor made obvious over, the prior art of record.

- **Claim 10** specifies a disk cartridge drive apparatus with a disk cartridge which requires:

*“...a shutter opening piece provided in said holder slides configured to slide said shutter supported upon the case of said recording medium cartridge to open said opening when said recording medium cartridge is normally inserted into said holder and to strike the opening edge of said function expansion groove of said case of said recording medium cartridge when said recording medium cartridge is inserted into said holder in an erroneous direction preventing erroneous insertion of said recording medium cartridge into said holder.”*

These features, in combination with the other features of Claim 10 are not anticipated by, nor made obvious over, the prior art of record.

- **Claim 11** specifies a disk cartridge which requires:

*“...an opening edge of an eject direction side of the function expansion groove opposite to said insertion direction is located at a connecting portion of an other side located opposite to the one side and the arc surface, and when said recording medium cartridge is inserted into said holder of said recording medium drive device in an erroneous direction, the opening edge of said function expansion groove of said case contacts the shutter opening piece of the recording medium drive device to prevent erroneous insertion into the holder. ”*

These features, in combination with the other features of Claim 11 are not anticipated by, nor made obvious over, the prior art of record.

- **Claim 12** specifies a disk cartridge which requires:

*“...a function expansion groove is provided in the arc surface of said semi-circular portion in the vicinity of at least one side of said substantially rectangular portion, an opening for recording information from said recording medium drive device onto said recording medium or reading information recorded on said recording medium is provided in said semi-circular portion or said substantially rectangular portion, and, when said recording medium cartridge is inserted into said holder in an upside-down direction, a projection provided on said holder is engaged with said function expansion groove provided in said arc surface of said recording medium cartridge to prevent the erroneous insertion of said recording medium cartridge.”*

These features, in combination with the other features of Claim 12 are not anticipated by, nor made obvious over, the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
